

Operation Steps for Advanced Parameter Delivery (files with .csv extension can be operated in excel)

STEP 1 : After logging in as a member, click “SMS delivery”

→ “Advanced Parameter Delivery “

STEP 2: “Advanced Parameter Delivery” has the same setting options as normal SMS delivery- “Immediate/Reserved” where you can set your time and content. It can also be edited via Excel, Note, or other editing software. (Click sample).

Advanced – Parameter SMS Delivery

Parameter SMS. Immediate/Scheduled delivery

Currently the remaining point is 99986, and the point will be deducted when SMS is successfully delivered (to telecommunication provider).
Failed delivery will not cause point deduction, but the points will be reimbursed to your account in two days.

Delivery way:	<input checked="" type="radio"/> Immediate <input type="radio"/> Scheduled time <input type="text"/> :00 Hour <input type="text"/> :00 Minute
	<div style="border: 1px solid black; padding: 5px;"> DEAR [field0]:Your booking room number is [field1] and that room price [field2] thank you for your booking. </div> <p>1 point deducted for Taiwan number, 2 points deducted for Hong Kong, Macau, China, Japan, Malaysian, Indonesia, Vietnam, Thailand and Australia numbers. For pure English text, 160 characters refer to one message, and when exceeding 160 characters, every 153 characters will make another message. For Chinese-and-English text, 70 characters refer to one message, and when exceeding 70</p>
SMS	

STEP 3 : When editing extension .csv on EXCEL, in the first column “receiver’ s number,” please set each message’ s receiver’ s number (mobile phone can start with 853/81/60/61/66/62/84 for Macau/Japan/Malaysia/Australia/Thailand/Indonesia/Vietnam); in the rest columns, items such as names, order number, total sum, etc, can be set by each parameter (the content in each column can be presented as [field0], [field1], ….[fieldX]) :

Column A refers to receivers’ mobile phone numbers. Key in numbers in order or paste your contact lists.

Starting from Column B(i.e. Field 0), you can set your own parameters. The number of the items refer to [Field 0], [Field 1], ….[Field X], as shown as “Name,” “Order Number,” and “Sum

	A	B	C	D
1	CELL PHONE	NAME	BOOKING NO.	CASH
2	85366000123	DAVID	1234	8000
3	81960000098	STEVEN	1235	9000
4	60127777123	ANGELIN	1236	10000
5	84128888123	ALEX	1237	20000
6	61412399123	THOMAS	1238	30000
7				

When editing the extension with .csv on EXCEL, the format of each column shall be set as text, and saved as a file name with the extension “.csv” . If you agree to save the file, click “yes” or”

correct” to complete the saving action.

STEP 4 : In the Sample, the file name is “Test Advanced Parameter Delivery.csv.” When going back to the page “Parameter Text Immediate/Scheduled Delivery,” the “message content” added should include such parameters as [field0], [field1], etc.. Then, after selecting the parameter files, click “preview.”

Advanced – Parameter SMS Delivery

Parameter SMS. Immediate/Scheduled delivery

Currently the remaining point is 99985, and the point will be deducted when SMS is successfully delivered (to telecommunication provider).

Failed delivery will not cause point deduction, but the points will be reimbursed to your account in two days.

Delivery way:	<input checked="" type="radio"/> Immediate <input type="radio"/> Scheduled time <input type="text" value="00"/> Hour <input type="text" value="00"/> Minute
SMS content	<div style="border: 1px solid red; padding: 5px;">DEAR [field0]:YOUR booking room number is [field1] and that room price [field2] thank you for your booking.</div> Select parameter files: <input type="button" value="選擇檔案"/> ADVAN EXP.csv
Receiver & Parameter:	<p>Sample download Explanation: Upload a csv file. The first column is the receiver’s phone number. The second column is the 1st parameter. The third column is the 2nd parameter. The fourth column is the 3rd parameter, and the like. SMS content with [fieldX] will be considered as parameters. [field0] will be replaced by the first parameter. [field1] will be replaced by the second parameter. [field2] will be replaced by the third parameter, and the like.</p> <p>SMS content Sample: Dear Mr./Ms. [field0] your order number [field1] is successfully paid, and the amount of cost is NT [field2]</p> <p>Phone number format: Taiwan number:0912345XXX(10 digits) China number:135XXXXX123(11 digits) HK number:54XXX123(8 digits) Macau number:85366XXX123(11 digits) Japan number:8190XXXXX123(12 digits) Malaysian number:6012XXXX123(11 or 12 digits) Vietnam number:8412XXXX123(11 or 12 digits) Indonesia number:628123XXX123(12 or 13 digits) Thailand number:668123XX123(11 digits) Australia number:614123XX123(11 digits) Notice: Be sure to add country code 853/81/60/84/62/66/61 before Macau, Japan, Malaysian, Indonesia, Vietnam, Thailand and Australia numbers.</p>
	<input type="button" value="Preview"/>

On the “preview” page, the first data shown will be presented as the name 1. And because the word counts will be different based on the customers’ names and order numbers, the points will deducted differently. Click “deliver” to complete the action.
